

MAI™, Messaging Agent™ 1.1 for Rich Email™

Rich, Easy & Un-Attached™

- Ideal for PC's, PDA's, Mobile Phones & Internet Appliances
- Instantly View Email Attachments Any Device, Any Time, Any Where
- A Must for Business, Public Sector, and Home Users Alike
- Share Photos and Rich Content with Colleagues, Friends, & Family

■ Everyone Will Enjoy Email with MAI

MAI (pronounced "my") is a must have software agent that allows email attachments to be easily and efficiently viewed on personal computers and information appliances including the latest wireless devices!

MAI works for you, converting your email attachments to standard HTML for instant and easy access. MAI knows how to unpack MIME files and decompress ZIP files. Don't settle for stripped down text, MAI delivers the entire document including drawings and pictures!

MAI is compatible with international systems. MAI will accept all languages including Japanese, Chinese and Korean fonts! MAI is reliable, secure and most important saves you time! Watch MAI grow and scale with your changing needs!

The MAI software platform resides securely in the data center with the email server. There are no software applications or plug-ins required for the client device allowing the user to go anywhere and access email quickly and efficiently! Use a myriad of devices from the most state-of-the-art PC to a PDA or web enabled mobile phone, and MAI will have your documents ready and waiting. MAI is smart and knows to reformat your documents for optimal viewing on your registered device.

MAI is based on open standards. MAI works with popular internet and personal computing defacto standards. Openshark has designed an open API (application programming interface) that enables 3rd parties to develop additional translation agents to further extend MAI's capabilities.
